

Discernis Discovery

Discover What Matters. Faster. Smarter. For Less

Stop Drowning in Documents and Start Finding Answers

Every case has a story hidden in its documents. The problem? Traditional discovery makes it very difficult to find it.

- **Keyword searches miss critical context.**
- **Human review teams are expensive, inconsistent, and can be slow.**
- **Technology Assisted Review (TAR) can't keep up with the demands of modern litigation.**

Discernis changes everything. The Discernis AI-Native Discovery platform gives legal teams the speed, accuracy, and insight they need to win — and at a fraction of the cost.

Evaluate Each Platform

With Discernis Discovery, you don't need to master Boolean logic or guess the right keywords. Just describe what you need in plain English, and your AI goes to work.

- **Understands intent and context, not just exact terms**
- **Identifies relevant documents that keyword searches miss entirely**
- **Eliminates false positives that waste reviewers' time and inflate costs**

For example, when a party refers to "the deal we closed last Thursday," Discernis Discovery finds related documents where a keyword search for "contract" won't. Relevance is really about meaning, not just matching.

Remarkable Accuracy — Guaranteed

Discernis delivers results you can rely on with exceptionally high accuracy rates:

Metric	Discernis Performance
Relevance Classification	~95%+
Precision (relevant docs retrieved)	~90%
Recall (relevant docs found)	~95%

These results exceed traditional TAR and outperform even the most experienced review teams — without the fatigue, distraction, or inconsistency that comes with human review. The result:

Stronger case preparation, reduced risk of missing critical evidence, and complete confidence in your review results.

Review Millions of Documents in a Fraction of the Time

Time is among the most valuable assets in litigation. Discernis protects it.

Discernis AI processes document collections at a speed no human team can match — applying the same standards to document number 1 as it does to document 1,000,000, resulting in a faster, more reliable foundation for everything that follows. No fatigue. No shortcuts. No variance.

The results you need, only better and quicker. That means faster privilege review, earlier deposition prep, and more time for the strategic work that wins cases.

Not Just Sorting — Real Understanding

Discernis Discovery doesn't just tell you which documents are relevant. It tells you why.

- **Attorneys receive clear explanations of relevance reasoning**
- **Key themes appear earlier, and connections between documents become visible**
- **Strategic insights that once took weeks to develop emerge significantly sooner**

This is the difference between a tool that organizes your documents and one that helps you understand your case.

Flexible Deployment. Dramatic Cost Savings.

Discernis meets you where you are:

- Discernis Private Cloud deployment for maximum scalability
- Discernis Cloud deployment for easy access
- On-premises deployment for organizations with strict security or regulatory requirements

And the financial impact? Discernis Discovery costs up to 90% less than traditional review. That means:

- Smaller cases that were previously cost-prohibitive become viable
- Larger cases stay within budget
- Resources shift from document review to the strategic work that requires experienced legal judgment

Ready to Transform Your Discovery Practice?

Discernis AI-Native Discovery isn't an incremental improvement to your existing workflow — it's a complete reimagining of what discovery can be. It gives you the tools you need to find the truth in the documents, tell a compelling story, and serve your clients at the highest possible level.

Faster. More accurate. More affordable. More insightful.
