Discernis Investigations

Turn Documents into Strategic Intelligence — Faster Than Ever Before

The Challenge: You Don't Know What You Don't Know

Discernis Investigations helps you gain strategic and proactive insight into your data collection, changing the equation to leverage information beyond traditional document review. Legal teams can move past rigid keyword searches and use natural language searching with greater speed, accuracy, and cost efficiency — giving you a powerful foundation for investigative work.

What Discernis Investigations Delivers

Early Case Assessment — Finding What You Need

Keyword search forces you to define relevant information upfront. Discernis Investigations doesn't, you start with broad, natural language queries that evolve as the picture becomes clearer — moving beyond relevant documents to uncover patterns and exposures you might have missed entirely.

What looks like a straightforward contract dispute may reveal a pattern of communications suggesting broader liability. With Discernis Investigations, you find it first — before opposing counsel does.

Investigations That Adapt in Real Time

Investigations rarely unfold as expected. New parties emerge. Documents are uncovered that change the entire theory of a matter. Discernis Investigations gives your team the agility to adapt and respond.

- **Re-run analyses instantly with updated parameters**
- **Explore new lines of inquiry without restarting the review**
- **Stay ahead of unexpected developments — avoid scrambling to catch up**

Behavioral Analysis and Employee Conduct Investigations

When HR matters arise — such as layoffs, discrimination claims, hostile workplace allegations, or suspicious employee behavior — Discernis Investigations delivers fast, objective, fact-based answers. The Native-AI analyzes large volumes of internal communications with nuance, including identifying:

- **Changes in communication patterns**
- **Evidence of employees acting on confidential information**
- **Unusual spikes in data transfers or access**

Rather than relying solely on verbal accounts, your team can build a clear and evidence-based picture of what happened, when, and who was involved.

Corporate Issues and Damage Assessment

Regulatory inquiries, compliance failures, reputational incidents — when corporate issues arise, speed is everything. Discernis Investigations enables your team to rapidly assess the situation, understand your exposure, and get ahead of the narrative before it gets ahead of you, forcing a reactive response.

Explore potential liability across business units, geographies, and time periods, even ones that aren't immediately obvious, so nothing catches you off guard.

Smarter Resource Allocation and Litigation Strategy

The insights generated through Discernis Investigations can directly inform your most consequential decisions:

- **Structure your team more effectively and determine whether to use in-house resources, a boutique firm, a large litigation firm, or a legal service provider (LSP)**
- **Conduct meaningful preliminary investigations before engaging outside counsel, reducing costs and improving the quality of your briefing**
- **Make a settle vs. trial decision with confidence, grounded in a clear-eyed view of the data**

Why Discernis Investigations?

Legal professionals have always wanted the same thing: the full truth of the facts, as fast and affordably as possible. Discernis Investigations delivers on that promise, with AI-native technology built specifically for the demands of modern litigation and investigation.

Discernis Investigations provides clarity by delivering ~95%+ accuracy in relevance classification. Having the ability to find, understand, and act on facts before the other side is not just an operational advantage; it's a strategic one. Get to the facts first and build your strategy around the full record. The result — smarter investigations, better-informed decisions, and stronger outcomes.

Example Investigation Scenarios

- **Assess staff activity following layoffs**
- **HR assessment of discrimination**
- **Inappropriate behavior situations**
- **Corporate accident or damage exposure**
- **Manufacturing issues**
- **Determining optimal legal resources**
- **Establishing case position strategy**
